REMARKS

This application covers 871.53 acres of ground with a decreed water right in the Bartlett Decree under Proof No. 00166. Proof No. 00166 is broken down as follows: 511.11 acres of harvest 60.58 acres of meadow pasture and 299.24 acres of diversified pasture.

This application covers 1,280 acres of ground which is an additional acreage of 408 acres to the amount of ground given a water right in the Bartlett Decree under Proof No. 00166.

The application up grades the water right for meadow pasture and diversified pasture of Proof No. 00166 to 3 acre feet thus making it possible to develop this ground to a harvest type of culture. It also increases the acreage irrigated under Proof No. 00166 by 408 acres which will be a harvest type of culture requiring 3 acre feet per acre.

Ground under Proof No. 00166 is decreed a water right in the amount of 1,849 acre feet. This application is for an additional 1,991 acre feet which allows a total acreage of 1,280 acres covered by the application to be developed into a harvest type of culture.

The application is for an irrigation flow for the entire 1,280 acres covered by the application of 6 c.f.s. per 100 acres of ground to be irrigated. Because of the type of ground and the characteristic flow of the river and its tributaries the most economical irrigation head for good husbandry is 6 c.f.s. per 100 acres.

The intent of this application is to appropriate 1,991 acre feet of the surplus waters of the Humboldt River. Surplus water being considered the water above the 100% decreed flow of all the prior decreed and permitted rights on the Humboldt River system to this application.
